

Research for project 3

Business: AutoCustomz

Formacar: <https://www.formacar.com/en/configurator.html#>

Formacar is an automotive information portal that offers a wide range of customization options for vehicles. Users can modify their cars with options for aerodynamic elements, exhaust systems, suspension changes, brake systems, and more.

Formacar provides an extensive array of customization options, allowing users to tailor every detail of their vehicle to their liking.

The website boasts a sleek, modern design that is both visually appealing and easy to navigate. The use of high-quality images enhances the overall user experience.

Formacar includes a wealth of information about car tuning and customization, helping users make informed decisions about their modifications.

3DTuning: <https://www.3dtuning.com/en-US/>

3DTuning is a robust platform offering a 3D car configurator, where users can customize a wide range of vehicles with various tuning parts, materials, and suspension settings. The website also features a vibrant community of car enthusiasts who share their custom builds.

The interface is visually appealing and user-friendly. The 3D models are detailed and responsive, making it easy for users to interact and customize vehicles.

The range of tuning options available is extensive. Users can modify virtually every aspect of their vehicle, from wheels and paint to engine and suspension settings.

The website fosters a sense of community by allowing users to share their custom builds, participate in discussions, and get feedback from other car enthusiasts.
